By searching remote beaches around the world, we have found the best landscape materials. From South America to the Eastern Pacific, our landscape line is composed of exclusive beach pebbles. These products allow any accent feature or ground cover to stand above the rest with unmatched distinction.

Our decking aggregates and shell are reliably sourced from quarries and beaches around the world. They showcase the stunning diversity of nature creation and carry the essence of their origins. From resin coated patios to pavers to counter tops to terrazzo flooring these products are sure to amaze.

\*Please note that while we make every effort to ensure color accuracy in our marketing materials, the color of our sands displayed may vary slightly due to differences in monitor settings, screen calibration, and printing processes.

Consolidated Aggregates industrial sand products undergo an intense cleaning process with fresh water, particular gradation control, and a superior drying process that provides supreme quality material to the market. Our sand products are used in several different industrial applications such as filter media, trowel and broadcasting, geo-thermal drilling, construction, polymeric sand, athletic fields, golf courses and tank bottom sand.

We manufacture multiple products, historically under the Stone Edge Surfaces brand, to meet the needs of professional contractors. All our products are made in the USA in our own facilities. These concrete overlays range from complete decorative systems to commercial self-leveling, patch and repair, and bond coat solutions.

\*Consolidated Aggregates works diligently to replicate the mortar color samples provided; however, due to varying lighting and normal printing limitations, these color samples might not accurately reflect the exact shade or hue of the mortar on your job. It is recommended you prepare an on-site sample using the same sand, masonry units, and construction practice that will be used on your project before finalizing the project's color selection.

We offer 12 colors of preblended Type S and Type N Masonry Mortars in either 60 lb. bags or 3000 lb. bulk bags. We take care of pre-blending the colored mortar at our manufacturing facility to ensure consistency of color throughout your project, so you don't have to hassle with on-site blending. We also have several mobile masonry silos that are available to use on your large commercial jobs.

100% Recycled Glass | UV Light Resistant | Scratch Resistant | Brilliant Long-Lasting Finish | Available in Sizes #0 & #1 | Special Colors can be Requested | 4 Pallet Order Min.

\*Colors shown approximate the shade of color based on a 5 sack mix (3000 psi) using Grey Type 1 cement at a 4" slump. Variations can be expected due to differences in cement color, slump, aggregates, admixtures and method of application. We recommend that a test slab be poured and approved prior to the start of the job. Use this chart as a guideline only. Colors shown are representative of integral colored concrete sealed with a decorative concrete sealer product.

Consolidated Aggregates Integral Colors are packaged in pre-measured per cubic yard repulpable bags. Iron oxide pigments are used in ready mix, pre-cast, tilt-up, ornamental concrete, shotcrete, mortar, concrete masonry units, pavers, roof tiles, and retaining wall units. Additional uses are to color stucco, plaster, cast stone, and many other cement-based construction materials.

# About Us

In late 2003, after many years helping build a successful business with previous business partners, Laurence and Mark Turley came to a crossroad in life. They decided to bring a collection of experiences they had in business, mining, and aggregate supply and launch Turley International Resources. Their vision was to build the infrastructure that would support the product growth spanning multiple industries allowing the company to maintain the balance needed when mining their own materials. Their vision was also to help other strategic supply partners maintain that same supply balance. That vision is alive and well as seen in the growth of the business over the course of the last 20 years. Consolidated Aggregates is a division of Turley International Resources.

## FAQ's

► How do I place my order with Consolidated Aggregates?

Please email your PO to [orderdesk@consolidatedagg.com](mailto:orderdesk@consolidatedagg.com). An order confirmation email will be sent once the order is processed. You will receive another email update when the order is released to the shipping department.

► Do you provide "In-House" freight services?

Yes. We have an "In-House" logistics team that can secure competitive rates on full truckloads (vans or flatbeds), LTL, and UPS shipments. Please communicate whether you would like to use the "In-House" freight service when you place your order.

► How can I get technical data and specifications?

On our website, navigate to "Products" and you will find links to the TDS and SDS documents that we have available.

► Do you offer custom toll blending?

Yes. We have the screening, drying, bagging, and palletizing infrastructure for toll blending opportunities. Please contact us to discuss viability, lead times and minimum order quantities.
